## Chapter 1 Web Research Assignment

### Response to Question 1

1a.

Tim Berners Lee founded w3c in 1994 at the MIT Laboratory for Science in collaboration with CERN and support of DARPA and European Commission.

1b.

W3C Membership is open to everyone and any type(profit/nonprofit) of organization. The fees range from 2,250 to 77,000 annually.

1c.

W3C is also taking a role in the Internet of Things (IOT, e.g. connecting your fridge to the internet). They are also looking into non connected devices such as avatars that are things like people cars that have a history. Avatars can be used to build applications that combine information from different sources.

### Response to Question 2

2a.

The Internet society was created to persuade governments to make policy choices that promote open access for everyone.

2b.

The near chapter to me is in San Fransisco.

The url is <http://www.sfbayisoc.org/>.

They also offer a workshop on internet identity.

2c.

Anyone can join Internet Society and it is free to join. I would recommend a beginning developer to join as it seems to be an advocacy group something akin to EFF.

### Response to Question 3

3a.

Anyone can Join WOW and it costs \$29 for students.

3b.

WOW has an event called Web security fundamentals, that I would join if it fits my schedule because securing a web site sounds interesting.

3c.

WOW has certification programs, education programs, and community that can help me in my future career as a web developer.
